Cotton: World Markets and Trade

World Production Down and Consumption Up in MY2002/03

World production and consumption for 2002/03 are projected at 91.0 and 95.5 million bales, respectively, reducing world stocks almost 10 percent to 40.6 million bales. Production is projected to fall 7 percent as the current season's historically low prices significantly reduce planted area in northern hemisphere countries. World use is expected to grow to a record 95.5 million bales. The more than 2-percent increase is above the long-run average growth rate, as economic recovery and competitive cotton prices stimulate demand. Larger consumption will also boost world trade to a level not seen since the late 1980's.

U.S. COTTON OUTLOOK

The first U.S. estimates for 2002/2003 reflect lower production, higher consumption and exports and a large decrease in ending stocks. Production is projected down 12 percent at 17.8 million bales, based on USDA's Prospective Plantings and average abandonment and yields. Domestic mill use is projected at 7.8 million bales, up just over 2.5 percent from 2001/02 as growth in retail demand more than offsets competition from textile imports. U.S. cotton exports are projected at 11.0 million bales, unchanged from 2001/02. Exports are expected to benefit from strong foreign import demand and large exportable supplies in the United States. Stocks are expected to decrease 13 percent (1.0 million bales) to 6.7 million bales, or 36 percent of total use.

This month's 2001/02 U.S. projections include higher domestic use and exports, resulting in lower ending stocks. Production is reduced just 2,000 bales, to remain at 20.3 million, based on USDA's final Crop Production report. Domestic mill use is raised 100,000 bales as the upward trend in mill use continues due to improved economic conditions. Exports are increased 500,000 bales to 11.0 million, as export sales and shipments remain strong. Projected ending stocks are lowered 600,000 bales to 7.7 million bales.

WORLD COTTON OUTLOOK

The initial 2002/03 forecast is described on the cover.

The world 2001/02 situation includes higher production, consumption, stocks, and trade this month. Historical changes for Brazil accounted for most of the stock and production changes. Other changes include; production increases of 100,000 bales for Australia and 200,000 bales for Pakistan, consumption increases of 100,000 bales each for Mexico and the United States, 250,000 bales for China and 150,000 bales for Turkey. The world export forecast is increased 406,000 bales as increases in the U.S. and Australia are partially offset by several smaller decreases. World stocks are increased 378,000 bales this month, to 44.8 million bales. Bahrain and Mauritius have been added to the database of countries. See Supplement A for historical data for Bahrain and Mauritius.

Note: For more information on historical revisions for Brazil, see Supplement B for a complete description.

COTTON PRICES

Cotlook A Index: The A-Index, a principal measure of international cotton prices, is an average of the five lowest quotes of cotton for delivery to Northern European ports. In April, the index averaged 41.38 cents per pound, down 0.66 cents from the previous month. The West African quote was the lowest in the index, averaging 40.73 cents per pound for the month of April. The Memphis quote averaged 44.25 cents per pound.

Futures Prices: The May 2002 contract averaged 36.18 cents per pound in April, down 1.93 cents from last month.

U.S. COTTON HIGHLIGHTS

Cotton Consumption: The seasonally adjusted daily rate of U.S. cotton consumption in March 2002 was 29,317 (480-lb.) bales, up from 29,264 in February. A total of 768,408 bales were consumed during the five weeks of March, compared with 602,165 during the four weeks of February. The seasonally adjusted annualized consumption rate for the month of March was 7.7 million bales, up from 7.6 million in February.

Textile mill report: Domestic mills purchased a light volume of current crop cotton for summer delivery. A moderate volume of 2002/2003 cotton was also booked.

Cotton Stocks: U.S. cotton stocks on hand in consuming establishments at the end of March were 351,679 bales (480-lb), down from 354,127 in February. Stocks held in public storage and compresses in March totaled 12.2 million bales, down from 13.9 million in February. Active spindles in March totaled 2.78 million, of which 1.64 million were dedicated to 100-percent cotton, compared with 3.67 million for the same time last year, with 2.00 million dedicated to 100-percent cotton. Cotton's share on the spindle system in March was 82 percent.

According to the U.S. Bureau of the Census, U.S. cotton exports in February 2002 totaled 1,103,233 (480-lb.) bales, up from 986,505 bales in January. Turkey accounted for over 20 percent of February exports. Indonesia, Mexico, and Taiwan were other important destinations in February.

U.S. cotton imports in February 2002 came entirely from Egypt and totaled about 5,600 bales, up 4,000 bales from the previous month.

1/ Includes Cotton, Cotton Yarn, and Cotton Fabric.

2/ Total Cotton Registrations includes registrations and/or cancellations from Oct 1, 2001.

3/ Net registrations for period ending.

4/ Number in parenthesis is maximum term in months.

5/ Bolivia, Chile, Colombia, Ecuador, Peru, and Venezuela.

6/ Belize, Costa Rica, El Salvador, Guatemala, Honduras, Nicaragua, and Panama.

7/ Korea has a total Credit Guarantee of \$575 million, of which \$100 million is allocated specifically for cotton.

8/ Repayment terms are 180 days.

9/ Estonia, Latvia, and Lithuania.

10/ Barbados, St. Lucia, St. Vincent and the Grenadines, Dominican Republic, Jamaica, and Trinidad and Tobago.

11/ Argentina, Bolivia, Brazil, Chile, Colombia, Ecuador, Peru, and Venezuela.

12/ Romania and Bulgaria.

NOTES:

* First registration of cotton for fiscal year.

Registrations current as of April 26, 2002

May-02

* Loss for countries outside the United States reflects cotton lost or destroyed while in the marketing channel. For the United States, loss reflects the difference between stocks as reported by the Bureau of the Census and implicit stocks based on supply plus total use. A negative "loss" is a positive number.

1/ Reflects only trade among the 12 countries of the former Soviet Union and three Baltic States.

2/ Reflects NIS trade with external trading partners.

3/ Estimate.

4/ Projection.

Notes:

A: Adding internal and external trade will provide a total trade figure.

B: Ending stocks may include any loss that has occurred.

C: The NIS includes: Armenia, Azerbaijan, Byelarus, Estonia, Georgia, Kazakstan, Kyrgyzstan, Latvia, Lithuania, Moldova, Russia, Tajikistan, Turkmenistan, Ukraine, Uzbekistan.

This month's supply and demand estimates for Brazil reflect changes beginning in 1969/70 to reconcile production estimates with those of Brazil's National Supply Company (CONAB) and consumption estimates with the Brazilian Association of the Textile Industry (ABIT). Estimated ending stocks are raised over the period of the past five years based on recent analysis of Brazil's probable stock levels relative to production, as well as calendar year stocks data provided by CONAB. Cotton production has made a significant shift to the later-harvested states of the Center West region beginning in the latter half of the 1990's; thus, at least half of Brazil's cotton production now resides in or near the production areas at the end of the August-July marketing year. Since the revised production and consumption series indicate lower calculated stocks, the differences between supply minus use and estimated ending stocks are included as residuals in the "loss" category, beginning in 1996/97, pending further investigation. This methodology is consistent with the estimation of stocks and loss in the balance sheets for Australia and the United States
